REQUEST FOR QUALIFICATIONS

Professional Engineering Services for City of Horseshoe Bay's Wastewater Treatment Plant Expansion

The CHSB is planning for the expansion of its existing Sequence Batch Reactor wastewater treatment facilities from 0.8 million gallons per day to 1.2 million gallons per day. All treated effluent is applied to area golf courses for beneficial reuse. The schedule for the project is to have the design work completed by August 2018 and begin construction in October 2019.

CHSB requests Statements of Qualifications for Professional Engineering Services includes development of construction plans, specifications, estimates, bidding support, and construction management for the expansion and improvements project.

Interested firms or teams must have extensive knowledge and expertise in the technical areas of wastewater treatment plant design, land surveying, public outreach and involvement, environmental regulations, coordination with local, state and federal regulating agencies, contract management, and construction phase management services.

Statements of Qualifications are to be delivered no later than 3:00 p.m. on Friday, August 31, 2017.

To receive further criteria and information for submission of a Statement of Qualifications for this proposed project, please contact:
