

## **Replacement Trash Carts Coming to City of Horseshoe Bay**

Exciting news! The blue residential trash carts we see each week placed curbside are being replaced with brand new green carts from Waste Management (WM) the City's waste collection company. Starting Monday April 5 please place your current blue cart curbside for normal garbage pickup on your normal day. No change in your normal weekly routine required. All residential garbage is picked up on Monday through Wednesday.

Next, do NOT remove that blue cart from the curb once it is emptied. Soon after it is emptied a new green cart will appear and the old blue cart will disappear. Just that simple. Blue Out—Green In (to your garage etc.) is the slogan!! Now, the goal is to complete all replacement operations that same day and most will be. However, in case you see your blue cart still there that evening or the next day, please do not fear or call City Hall. Changing out several thousand carts is a massive undertaking with lots of personnel in several different trucks.

Now if you are going to be out of town that week please do not worry. Whether a part-time resident or on vacation we have thought about your situation too. Waste Management and the City will make sure you get an opportunity to change out your carts too. Please contact the City at [greencarts@horseshoe-bay-tx.gov](mailto:greencarts@horseshoe-bay-tx.gov) after April 9 to make plans for your new cart.

Please do not stress over this change. The carts are newer, cleaner, and the same size. We will work together on this large operation with minimal effect on you.
